

Outboard Engine Flush System

**Flush Engines with Minimal User Interaction
and Maximum Convenience**

Dockside
Hose Fitting

Quick-release
Bulkhead Fitting

Overview...

Outboard engines require fresh water flushing after use in salt or brackish water. Outboard Engine Flush System (OEF) models are offered for boats with 1, 2, 3 or 4 engines, 12VDC or 24VDC.

Easy to Use...

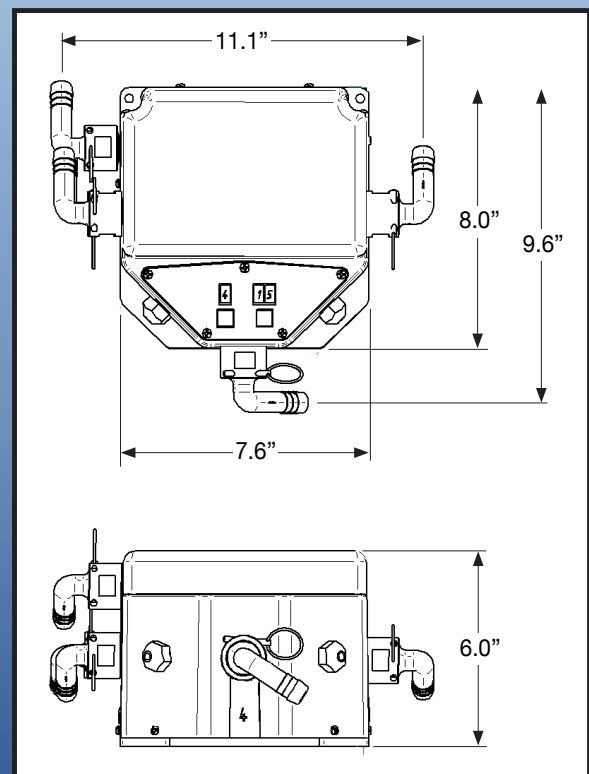

'Set it and forget it' best describes OEF operation. Connect dockside water to the Quick Release Bulkhead Fitting provided and press 'Start'. Then move on to other end-of-day duties. OEF will sequentially flush each engine for the duration you set, and will shut itself off when finished.

Easy to Install...

OEF includes Easalign™ 90-degree 5/8" ID hose fittings for all hose connection points. Easalign™ fittings provide a leak-proof seal without the use of sealant while allowing 360-degree rotation to simplify plumbing hookup. Straight or 45-degree fittings for 5/8" or 3/4" ID hose may be ordered separately.

Winterization ...

OEF-W winterization option (order separately) simplifies end of season maintenance.
